Experience

Microsoft AI
Product Designer
Aug 2023 – Present

Lead UX strategy for healthcare platform analytics across products, agentic workflows, and AI extensions; designed org-wide framework adopted by 40+ stakeholders.

Shaped future GenAI and voice vision for Dragon Copilot for Radiology; designed public preview features released in 30+ hospitals, including feedback experience that contributed to 300%+ growth in user input.

Led end-to-end redesign of PowerScribe One's AutoText Manager, modernizing administrative template workflows, shipped across 300+ hospital networks.

Redesign mPower's report search experience to reduce friction in complex query building, filtering, and result exploration for clinical research workflows.

Nuance, Microsoft
UX Research & Design Intern
May – Aug 2022

Redesigned the communication workflow between care teams and clinical documentation quality specialists in CDE One, a healthcare administrative tool, streamlining record reviews and follow-ups.

Philips
UX Design Intern
May – Nov 2021

Designed patient-facing therapy tracking and goal-setting flows for DreamMapper mobile app, simplifying complex CPAP usage data to drive adherence.

Snow Corporation
Motion Graphic Designer
Jun – Sep 2020, Feb – May 2021

Designed motion graphic templates for VITA Studio, a video editing app; used by 50K+ creators to produce Instagram and TikTok content.

Aphasia Games for Health
HCI Research Assistant
Jan – Dec 2020

Led design and illustration of aphasia-friendly games for people with language impairments, in partnership with University of Pittsburgh researchers and Thorny Games.

Project

NurseBridge
Product Designer
Sep 2024

Conducted user research and shaped product strategy for NurseBridge, a wearable AI assistant for migrant nurses offering real-time translation and medical term lookup; won first place out of 176 teams in Microsoft Global Hackathon.

Education

Carnegie Mellon University
May 2023

Bachelor of Design
Minor in Human-Computer Interaction
